Awards

ZyXEL recognised as 'Taiwan Excellence'

ZyXEL Communications' power line series has been recognised as the winner of '2012 Taiwan Excellence' title. Underscoring Taiwan's advancement towards standards in terms of product innovation, design, marketing and quality, 'Taiwan Excellence' is given to products encompassing the 'innovalue' spirit. The award not only praises revolutionary design, outstanding quality and excellent value but also epitomises the unique talents that create innovative designs and manufacturing process of leading-edge products.

National Instruments among 100 best companies to work for

National Instruments (NI) has been honoured by *FORTUNE* for the thirteenth consecutive year among 100 best companies to work for. The company has advanced 34 spots on the national 100 best companies list since last year, with its position at number eighteen. This national recognition is based on an annual survey that randomly polls employees from hundreds of companies on the quality of their corporate cultures, and filters results through strict criteria to select the best workplaces.

Haier ranked top global major appliances brand

Euromonitor International has ranked Haier as the number one major appliance brand in the world with a 7.8 per cent retail volume share in 2011. The ranking marks the third consecutive year Haier has been given this honour. It also signifies a 1.7 per cent growth for Haier in global brand market share from 2010.

industry experts believe that the new year would bring in loads of cheers for job-seekers.

"If all goes well, and depending on policies of the government and market situation, more than 500,000 jobs will be created across all segments," said Sunil Goel, director, executive search firm GlobalHunt.

Monika Tripathi, vice president (heading the IT, ITeS, telecom and research practices) at recruitment process outsourcing firm Elixir Consulting, added, "The IT/ITeS sector alone will generate as many as 300,000 jobs in 2012." Elixir also predicts the hiring activities in the country to see a seven to eight per cent jump.

EnSilica's new design centre in Bengaluru

EnSilica has opened a design centre in Bengaluru to complement its existing design facilities in the UK. The new facility will be a centre of excellence for advanced verification of complex semiconductor products and IP. Verification services will be provided for both European and local customers based on a range of methodologies but with a particular focus on unified verification methodology and SystemVerilog.

The design centre will also provide

a scalable resource for projects requiring larger teams to accelerate time scales or deal with complex tasks.

Adani Group commissions India's largest solar power plant

Adani Group has commissioned India's largest 40-megawatt solar power plant in Kutch district, Gujarat. The plant has been commissioned in a record time of 150 days starting from foundation stone laying to electricity generation. Going forward, the company plans to expand the capacity of this plant to 100 megawatts.

The solar power plant uses solar photovoltaic (PV) technology and has over 400,000 solar PV modules mounted on 21,600 structures, which are erected on 130,000 foundations.

Huawei starts manufacturing in Chennai

Chinese telecommunications equipment company Huawei Technologies has started the production of components of network equipment gear at both its facilities in Chennai. The company has also disclosed plans to invest \$150 million to establish its R&D campus in Bengaluru. Over the last ten years, Huawei has invested \$400 million in the country on R&D, operations,
