TEST & MEASUREMENT

4000-count digital multimeter

Motwane has introduced M41 digital multimeter with 40 measurement ranges and 21 different functions. The multimeter has a 4000-count, backlit LCD and measures AC/DC current up to 20A, AC/DC voltage, resistance, temperature, capacitance, frequency and duty cycle. It can also perform diode and continuity testing.

M41 comes with CAT III/1000V protection. An ingress protection of IP54 is provided to safeguard it from dust and water.

True-RMS digital multimeters

Chauvin Arnoux has introduced CA 5231 and CA 5233 true-RMS digital multimeters.

The multimeters are equipped with a 6000-count backlit display with 61-segment bargraph. Using the NCV button, the user can detect whether a voltage is present or not even without connecting the multimeter. For hands-free working, the multimeters are supplied with a magnetic multi-position mounting accessory. These come in IP54 casing with built-in shock-proofing and are protected against

overloads of up to 8 kV.

Earth-resistance tester

Minoo Impex has introduced Metrix+ DET 1503 digital earth-resistance tester that complies with the international safety standard and comes in a dustproof and waterproof IP54 casing.

The tester can measure resistances in the range of 0.00-20 ohms and 0.00-2000 ohms and has a digital display with LCD backlight and function annunciation.

SENSORS

Thermal imager

Ideal Industries has introduced 61-846 HeatSeeker thermal imager that features dual cursors to locate the hottest and coldest temperatures on a live screen, and a camera to blend a thermal image on top of a digital image.

Other features include auto hot/cold tracker, wide-screen display, sequential image recording, class II laser, built-in LED illuminator and high- and low-temperature alarms. The imager marks images with text and voice annotation, and allows radiometric and temperature measurements over the entire image.

Movement sensors

Ideas Unlimited has introduced a heavy-load, external-fit-type movement sensor switch for air-conditioners.

The 185×112×52mm³ MS301-W15A has sensing range of 50.8×50.8 cm² (20×20 inch²) maximum, 2200-watt maximum load capacity and off-timer options with five minutes for areas with high activity and ten minutes

for areas with low activity. The sensor switch consumes 50 to 100 milliwatts of power in standby mode and 350 to 450 milliwatts in active mode.

COMPONENTS

System-on-module

iWave Systems Technologies has added i.MX53 system-on-module to its family of multimedia-focused products for automotive applications. The module supports major operating systems including Windows Embedded Compact 7, Android 2.3, Linux 2.6.35 and QNX. It integrates on-board 512MB/1GB/2GB DDR2 RAM, 8GB eMMC4.41 Flash, 16MB serial-peripheral interface Flash, 10/100Mbps Ethernet PHY and microSD slot. The module supports MXM-3 form factor of 85×85mm² size and MXM3 edge connector for input/output (I/O) expansion to support dual LCD, dual camera, USB2.0, SATAII, SD/SDIO, CAN, MLB, ESAL, SSI, SPDIF, video-in, TV out, SPI,
