

ATTENTION

LED Light Manufacturer

Channel Patti For LED Strip

Housing for Tube Light

Housing for Concealed Tube & Casing for T-5

Housing for Wall washer

Housing for LED PLL tube

Panel Light Housing

Round Panel Light Housing

Street Light Housing

SMPS For LED Strip

Housing for Flood Light

Our Product Range Consist of the following

- TRIO Dotted Lens, Lens for street light, 1 watt lens.
- Heat Sink for TRIO
- Channel Patti for Epoxy.
- Panel Light Housing.
- Street Light Housing - 12 watt to 150 watt
- Tube Light Housing - T-5/T-8, T-10.
- Wall Washer Housing - Ultra Thin, Heavy duty.
- Housing for LED PLL Light & Casing for T-5 Tube Light.
- Flood Light Housing - 30w/50w/60w/90w.
- LED Drivers : 1w-30watt, SMPS for LED Strips.

EFY DVD

The DVD with the January issue was very informative and the dedicated Linux Distro tailored with electronic applications really appreciable. Good job!

PCBs for Circuit Ideas

I am a regular reader of EFY magazine. I would appreciate if PCB layouts for circuit ideas are also included.

Colour Formatting of Source Code

I have read with keen interest the suggestions given by Mr Jagmeet Singh Hanspal in Letters section of January edition and recommend that EFY should adopt Notepad++ for printing source codes of various programs published in the magazine to make these more readable and presentable.

Notepad++ is a free software, released under GNU general public license. It supports 50-plus languages (C, C++, Java, C#, XML, HTML, PHP, Javascript, RC file, makefile, nfo, doxygen, ini file, batch file, ASP, VB/VBS, SQL, Objective-C, CSS, Pascal, Perl, Python, Lua, Unix Shell Script, Fortran, NSIS and Flash action script).

For microcontroller projects related software, the free integrated development environments made available by respective manufacturers have the capability to colour-format the code (in C, C++ and Assembly language) and the same could be used. The facility for the same can be created within Notepad++ by making use of its 'User Language Define System' in the menu bar and completing the items in its dialogue box, as required.

Blu-ray Home Theatre System

The Blu-ray home theatre system buying guide published in August 2011 issue was very educative, but it missed out on a very important aspect: Consumers buy a home theatre for use with a LCD or LED TV to get a better overall experience of 5.1- or 7.1-channel surround sound quality. Digital-quality high-definition channels too provide 5.1- or 7.1-channel surround sound. But this sound quality cannot be reproduced by some home theatres if there is no digital optical input socket in the Blu-ray player.

Serial Communication With AVR Microcontroller

I want to assemble the 'Serial Communication with AVR Microcontroller' project published in July 2011 issue. Where can I get the ATmega2560 microcontroller IC? Can you provide the project with ATmega2560 or can I use any other 40-pin microcontroller?

Abinash Kumar Sahu
Through e-mail

The author Prof. Arun Dayal Udaya replies: You can use a 40-pin ATmega16 for all your general-purpose applications. ATmega2560 can be purchased from Visha World, Mumbai, or ATMEL distributor Rajhith Traders, Mumbai. ATmega16 can be purchased online or from electronic component shops.

ERRATA

□ In 'Constant Current Battery Charger' circuit published in January issue, on page 129, please read the symbol of TIP127 as PNP instead of NPN as shown in the circuit.

□ In 'Solar LED Lantern' circuit in January issue, the third LED (LED5) was inadvertently added in the circuit. Please remove LED5 from the circuit as well as from the text.

□ On page 143 of EFY January issue, the picture of Binay Opto's tubelight was wrongly printed under Kwalify Electronics' write-up.
