

If It's Related to Electronics Labs It will be here.

Looking for latest products and solutions for electronics labs and teaching solutions?

Save time and effort. Visit Electronics For You Expo to connect with leading players offering latest solutions.

Electronics For You expo 2012

Innovate. Design. Manufacture. Source.

16 to 18 February, 2012
Pragati Maidan, New Delhi

Development Boards, Training Boards, Oscilloscopes, Power Supplies, Training Kits, Robot Labs, Antenna Labs, RFID Labs, Microcontroller labs, Training Courses, Design Software, Software Tools, Technical Books-as we said-if it's related to electronics labs, it will be there at the Electronics For You Expo 2012.

Master Electronics Through Self Learning Kits

If you want to go beyond theory and become a pro at electronics—here are a few self-learning kits that you should try your hands on. These kits are also a great resource for training institutes and engineering colleges.

Arduino self-learning kit

Arduino is the latest buzz in the world of electronics. Everyone is talking about it. It not only lives up to its open standards but also for the simplicity involved in mastering it, and the innovative applications that engineers are building around it.

Here's an excellent self-learning kit that includes an Arduino Duemilanove 328 Board (8 bit), a prototyping shield, a USB cable, a mini breadboard, jumper wires (20), 5 LEDs, 17 segment red LED, 12 volt 1 amp power adapter, 1 sound sensor, 1 touch sensor, 4 mini push-button switches, and a few components.

Self learning material includes CD containing tutorials and sample programs.

₹3490

AVR self-learning kit

If you want to master the AVR micro-controller, then this is the kit for you. The development board comes with in-built interfacing with a 16F2468 microcontroller, a stepper motor, a sensor (TSP Sensor) and a serial cable.

Self-learning material includes (i) Program CD (Data sheets, application notes, software and sample programs), (ii) Study material in the form of a booklet.

Plus, you get access to free online training (videos) and can get more assignments and even assessments done of your projects via online.

₹2990

8051 Self learning kit

8051 is taught in all engineering colleges. However, if you want to master this chip and try some hands-on projects, this is the kit for you. It's an excellent resource for those who want to master 8051 micro-controller. The development board comes with in-built interfacing with a 16F2468 microcontroller, a stepper motor, a sensor (TSP Sensor) and a serial cable. Self-learning material includes (i) Program CD (Data sheets, application notes, software and sample programs), (ii) Study material in the form of a booklet.

Plus, you get access to free online training (videos) and can get more assignments and even assessments done of your projects via online.

₹2750

40 Do It Yourself Projects

For those who want to gain hands-on experience in building electronics projects, this is a great kit to start with. The kit comes with a book titled CHIP-TALK Hobby Projects, which provides you with 40 different DIY projects to work on. Some of the interesting projects include anti-theft alarm, cordless FM radio, rechargeable white LED torch, 7 segment display clock, phone broadcaster, etc. Besides the book, the kit comes with a range of components (ICs) and a breadboard for trying out the DIY projects. Key components include: IC 555, touch sensor, light sensor (TSP245), IC 4060, LM386, IC4017, IC4019, 555 timer, IC4019.
