Electronics Bazaar Presents

Seminar on RoHS Compliant Electronics Manufacturing

Challenges, Solutions & Opportunities

February 21, 2013 • 2 pm onwards • Pragati Maidan • New Delhi

This seminar will provide practical insights into the inspection criteria, the changes that will take place in the process conditions, and how to monitor the process to get the highest yields. It will explain RoHS regulations, how to optimise key processes, the potential problems at each stage of manufacture, and how to avoid them. More importantly, it will discuss the impact of lead-free manufacturing on business opportunities in overseas markets as well as in India.

The Seminar Sessions

SESSION I: ROHS' IMPACT ON BUSINESS OPPORTUNITIES

What will be discussed in this session:

- The countries that already comply with RoHS standards
- The countries that will start complying with RoHS standards and by when
- The compliance criteria for different countries
- How to increase your company's competitiveness and cater to the overseas market's needs

SESSION II: CHALLENGES OF SUPPORTING ROHS/LEAD-FREE ASSEMBLY ON THE SHOP FLOOR AND POSSIBLE SOLUTIONS

What will be discussed in this session:

- Changing over to RoHS/lead-free assembly processes: Planning a strategy
- Challenges that could be faced while changing over to RoHS-compliant assembly processes, and the possible solutions
- How to audit key suppliers and EMS companies to avoid non-compliance risks
- What are the restrictions on the use of certain hazardous substances in electronics production
- What equipment changes are required
- What material changes are required
- Proof-of-compliance strategy for OEMs
- The challenges of procuring material and equipment for RoHS compliant processes and systems
- The records that are required to be created, collected and maintained, including supplier compliance, validation and exemption records

SESSION III: IMPACT OF ROHS REGULATIONS ON ELECTRONICS MANUFACTURING SUPPLY CHAIN

What will be discussed in this session:

- How will it impact material suppliers?
- How will it impact equipment suppliers?

SESSION IV: LATEST TECHNOLOGIES AND MANUFACTURING EQUIPMENT TO MANUFACTURE ROHS COMPLIANT ELECTRONICS

Objective of the seminar

The objective of this seminar is to help production managers and supply chain managers to effectively transit into complying with RoHS rules and regulations that require electronic manufacturing processes, equipment and material to be free of restricted substances, and for solders to be free of lead.

Who should attend

- Production planners
 - Manufacturing managers
 - Supply chain managers
 - Design engineers/ Quality engineers
 - Buyers
 - ...and anybody responsible for establishing, managing or participating in the transition to RoHS compliance.
- Operations managers, commodity managers and senior managers will also find this seminar a useful tool for protecting their company's brand name.

What you will learn from this seminar

- Basic RoHS standards and concepts
- The impact of these standards on your products and business
- How to develop a strategy for the transition
- How to reduce the excess and obsolete inventory caused by the transition
- How to reduce the challenges of continuity of supply associated with the transition
- How to reduce the reliability and quality risks associated with the transition
- The records required to be created and maintained, including supplier compliance, validation, and exemption records

Delegate Fee ₹2950
(inclusive of all taxes)
