Ito is CEAMA's Man of Electronics for 2012

Daizo Ito, president of Panasonic India, has been felicitated with Man of Electronics Award by Consumer Electronics and Appliances Manufacturers' Association (CEAMA). The award recognises Ito's all-round contribution to the Indian electronics and appliances segment.

ST and CEA-Leti researchers bag French award

A team of STMicroelectronics and CEA-Leti researchers has received the 2012 GénéralFérré Award. CEA-Leti is a premier research and technology institute in France.

Considered to be the highest award in electronics R&D in France, the GénéralFérré annual award honours engineers or scientific teams whose work has made a significant contribution to the progress of electronics and its applications.

Anritsu named global test and measurement company of the year

Frost & Sullivan, a growth partnership company, has chosen Anritsu Corporation as global company of the year for test and measurement. In selecting Anritsu, Frost & Sullivan cited Anritsu's strong customer relationships, ability to develop products that meet market needs, and value proposition, particularly in introducing test solutions for the LTE market.

TTI, Inc. wins Panasonic's distributor of the year award

TTI, Inc., a distributor of passive, discrete, connector and electromechanical components, has been named as Distributor of the Year 2012 by Panasonic Industrial Devices Sales Europe.

Highlighting the scope of investment in this field, Dr R.K. Pachauri, director-general, TERI, India, said, "Given the prospects for their growth in the next 15 years, along with the emerging technological challenges in this field, clean technologies present a very viable business opportunity for investors. There is hence an unprecedented need for research organisations and companies to work together in this direction."

With a bulging population and growing dependency on non-renewable forms of energy, India faces the threat of a severe resource-crunch under a business-as-usual scenario. According to a TERI study, the total commercial energy consumption is estimated to increase by 7.5 times from a level of 285 mtoe (million tonnes of oil equivalent) in 2001 to 2123 mtoe in 2031.

From April, only certified electronics products to enter India

The Indian government is looking to adopt a foolproof mechanism to mandate standards and certification for electronic products and services—according to a government official.

"By April 2013, an institutional mechanism to develop and mandate standards and certification for electronic products and services for strengthening quality assessment infrastructure nationwide will be in place"—Ajay Kumar, joint secretary, Department of Electronics and Information (DeitY) and Union Ministry of Communication and Information Technology, was quoted as saying in a PTI report.

In the first phase, "Fifteen electronic products will be tested and certified by laboratories accredited by the Bureau of Indian Standards (BIS)," Kumar added.

The process for setting up laboratories to test and standardise electronic products and services is currently underway and will be over by April this year.

Analog Devices launches university programme

Analog Devices has announced the launch of its university programme for engineering students in India. This programme will provide engineering students with a hands-on learning opportunity to supplement their core engineering curriculum.

PRODIGIT
Instrument Professional

DC Electronic Loads (AC/DC also available)

Prodigit DC Electronic loads available from 75 W to 40 KW, a wide range from a leader in Electronic Loads.

Applications

- LED Driver
- Voltage / Current source
- SMPS transient response
- Current limit testing and battery emulation
- Battery charger
- Battery discharge
- R&D / Quality Control
- ATE system
- Production testing

PUNE | AHMEDABAD | DELHI
CHENNAI | BANGALORE | MUMBAI
