

Test Systems with Unrivaed, Performance and Flexibility.

Modular Instruments from the company that invented PXI.

Since the invention of PXI in 1997, we have developed more than 500 modular instruments like Digital Multimeters, Oscilloscopes, High Speed Digital I/Os, RF Signal Analyzers, Signal Generators, Network Analyzers, Switches and AV Signal Generators and Analyzers. Faster test execution, improved productivity, higher throughput, and increased scalability are just a few of the benefits. NI PXI, combined with NI LabVIEW system design software, lets engineers reuse code right from the design validation to the manufacturing line to deliver the fastest test times and best-in-class performance.
