

Four Android Boxes To Convert Your TV Into Smart TV

These devices let you access the Internet and run Android applications on your large TV screen

AADDEEYTA S.

Android is the rage. Television, smartphone, tablet—you name it, and they have it. Of late, Android-based devices that convert TV into smart TV have been introduced in the Indian market by companies like Akai and Micromax. So if you are planning to buy one, consider the following options that offer smart interactive features on your television.

1 Woxi SmartPod

Price: Rs 9499

SmartPod is built with Enhanced Android featuring multi-user login capability—a first for any Android device around the world. It supports up to eight unique users on the device, enabling everyone in the family to get a personalised Internet experience. The unique home-screen is optimised for lean-back TV experience and brings TV's ease of use to SmartPod. The Magic Motion remote also features an elegant, full-function QWERTY keyboard for easy Web browsing, searches, Twitter and Facebook usage.

SmartPod is powered by dual processors—a 1GHz ARM Cortex A9 coupled with a 400MHz Mali 3D graphics processor. In addition to internal flash storage, up to 32 GB of storage is available using a plug-in SD card, or 1 TB or more of storage using an external USB hard disk drive. Virtually all media playback formats are supported, including formats that even Smart TVs don't support. SmartPod connects to the Internet via Wi-Fi or Ethernet. It also acts as a Wi-Fi router for your home, to connect other devices like laptop, tablet and smartphone.

2 Micromax Smart Stick

Price: Rs 4990

With Smart Stick from Micromax, you can enjoy Internet on your TV set, provided the TV has an HDMI port. Talking about features, Smart Stick has a standard HDMI interface, along with a

USB host. It also supports Wi-Fi Direct connectivity. You can connect it to a wireless mouse and keyboard that operate on 2.4 GHz wireless frequency.

Smart Stick runs on Android 4.0 Ice Cream Sandwich platform and has a 1GHz processing unit and 4 GB of flash memory.

3 Amktette Evo TV

Price: Rs 9950

Amktette's Evo TV is an integration of four components—Evo Box, Evo Touch, Evo View and Evo Discover—making the television a next-generation device with a large-screen gaming station, an on-demand music and movie theatre, an education hub and much more.

Powered by Android 2.3 *aka* Gingerbread, the device allows you to access videos, games and websites using Wi-Fi. Broadband connection is also enabled in the device. The remote control of the TV works as a mouse. A microphone has also been provided for voice and video chat using VoIP services like Skype.

4 Akai Smart Box

Price: Rs 6990

The Akai device is compatible with any television—be it CRT, plasma, LCD or LED. Using it you can browse Web on your TV or use any Android application as it supports Google Play. It supports Wi-Fi, Ethernet port, 3G dongle as well as 2G network connectivity through a SIM card.

Powered by a 1.25GHz processor, the device runs Android 2.3 *aka* Gingerbread and has 4GB internal storage, microSD card slot, HDMI port and four USB 2.0 ports. The device is compatible with almost all popular audio and video formats. ●
