

Interactive kiosks in operation to reach 3 million by 2016

As per ABI Research's report *Next Generation Kiosks and Self-Service Technology*, the number of interactive kiosks in operation will rise from approximately 1.6 million deployed in 2011 to nearly three million deployed globally by 2016.

As companies in a range of industries seek to reduce costs, increase revenue opportunities and improve customer service, they are increasingly turning to interactive kiosks as an additional channel to enable their customers with self-service options.

Cloud to take 51 per cent of data centre workload by 2014

In the inaugural Cisco Global Cloud Index (2010-15), Cisco estimates that global cloud computing traffic will grow twelve-fold from 130 exabytes to reach a total of 1.6 zettabytes (one zettabyte is equal to a sextillion bytes or a trillion gigabytes) annually by 2015—a 66 per cent compound annual growth rate.

The report also estimates that by 2015, 76 per cent of data centre traffic will remain within the data centre itself as workloads migrate between various virtual machines and background tasks take place. Seventeen per cent of the total traffic leaves the data centre to be

RIM announces Dutt as managing director, India

Research In Motion (RIM) has appointed Sunil Dutt as managing director for India. Dutt is an industry veteran with 27 years of experience in the Indian mobile technology and telecom sector.

"Sunil Dutt brings a wealth of experience to RIM. His strong managerial and communication skills, as well as an institutional understanding of the technology and telecom sector will be instrumental in driving the next stage of our business growth in India," said Urpo Karjalainen, senior vice president, APAC, RIM.

NXP appoints new country manager in India

Dr Sankara Narayan has been appointed as vice president and country manager for NXP in India. In this role, Dr Narayan will be responsible for managing and

delivered to the end user, while an additional 7 per cent of total traffic is generated between data centres through activities such as cloud-bursting, data replication and updates.

The Cisco Global Cloud Index was developed to estimate global data centre and cloud-based Internet protocol traffic growth and trends.

Flat growth in semiconductor sales in 2011

According to preliminary reaching results announced by Gartner, worldwide semiconductor revenues grew by merely 0.9 per cent over 2010, \$302 billion in 2011. It also stated that equipment and semiconductor orders slowed down in 2011 despite a strong start at the onset.

Stephan Ohr, Gartner's semiconductor research director, said, "The industry did well in the early part of the year, in many cases entering the year with a backlog from an exuberant

growing NXP's India operations. Additionally, he will focus on engaging with the local industry and academia to develop customised applications for the Indian market.

BT representatives resign from Tech Mahindra's Board

Richard Cameron and Nigel Stagg, directors of BT Group on the board of Tech Mahindra, have tendered their resignation. Tech Mahindra (formerly Mahindra British Telecom) is a joint venture between BT and Mahindra and Mahindra (M&M). With just 24.4 per cent stake in the company at present, the UK's telecom company BT is gradually lowering its stake in Tech Mahindra.

"The resignation of our nominee directors is a natural step in the progressive exit of BT as a shareholder of Tech Mahindra," said Dan Thomas, head of corporate media relations—London, BT.

2010, but uncertainty about the state of the macro economy set in at the midpoint of the year."

This led the consumers to hold off purchases. The build-up in the equipment inventories resulted in ripples throughout the semiconductor industry.
