

rolled out an online educational platform, named 'Topper Education,' for its landline broadband customers. The services will be launched in association with Greycell 18, and feature educational content for mathematics and science curricula of class IX to XII of CBSE, ICSE and other boards.

Announcing the launch of its online content services, BSNL stated that by using this service, BSNL subscribers can access education resources from a comprehensive library of video lessons covering the entire curriculum, study material and assessment tools. The study material includes 3D graphics and real-life examples to help students prepare for their exams.

IBM opens first Asia-Pacific airport solutions lab in India

IBM has launched an Airport Solutions lab in New Delhi. Co-located with IBM's Research and India Industry Solutions labs, the airport solutions lab will showcase IBM's novel technology innovations and solutions for airports and airlines.

The Airport Solutions lab will host technical and subject matter experts who will help customers witness and understand the various airport solutions that are offered by IBM. It will enable customers to have access to solutions in a wide range of areas such energy management, asset management, space management, airport operations management and security management, among others. As a regional hub, the lab will cater to airports across the entire Asia Pacific region.

QuEST Global inaugurates Siemens' offshore design centre

Singapore-headquartered engineering services provider QuEST Global Engineering has opened the Siemens Offshore Design Centre at its Bengaluru facility.

As a worldwide engineering partner of Siemens AG in Europe, the US and Asia, QuEST Global will

BP plans to quit solar business

British Petroleum (BP) has expressed its intention to quit the solar business worldwide. The information was revealed in a letter written by Mike Petrucci, chief executive officer, BP Solar, to the staff. The company cites the business being 'unprofitable' as the reason for the decision. The fall in the prices of solar panels globally is the main cause of solar business facing a downturn.

Bharti Telecom buys Rs 205-million Airtel shares

Bharti Telecom has acquired 590,240 shares of Bharti Airtel. The shares are worth Rs 205 million. Bharti Telecom, which is the biggest promoter group of Bharti Airtel, had a 45.6 per cent stake in Bharti Airtel and after the purchase, its share has moved up to 45.62 per cent.

Enzen partners Ciel et Terre for solar power

Bengaluru-based energy and environment consultancy Enzen Global Solutions has entered into an agreement with France-based Ciel et Terre to jointly develop projects utilising the vast water surface areas available in India for utility-scale floating photovoltaic (PV) power generation of 1 to 50 MWp.

IEEE-SA's guide for micro grids in India

IEEE Standards Association has introduced the IEEE 1547.4 guide for design, operation and integration of distributed resource island systems with electric power systems. It provides alternative approaches and best practices for deployment of distributed resource island systems or micro grids in India.

Vivitek partners with Intelliclass

Vivitek Corporation has partnered with Intelliclass for its e-learning programme. Intelliclass is an e-learning suite combining hardware and software ICT solutions for next-generation classrooms. "We are honoured to partner with Intelliclass and this team to contribute to an incredibly important initiative and help change the way people think about e-learning in India," said Hemant Agarwal, senior director, Vivitek.

INSIDE supporting HID Global iCLASS credentials

INSIDE Secure's SecuRead near-field communication (NFC) solution is now securing and powering the HID Global iCLASS digital keys and mobile secure identity feature available on multiple NFC-enabled smartphones. Since the establishment of its partnership with HID in 2001, INSIDE has been the supplier of semiconductor components for HID iCLASS credentials, and all INSIDE Secure NFC products are now supporting the HID iCLASS command set and protocol necessary to communicate with iCLASS readers.

Telenet adopts Sequans' LTE semiconductor solutions

Mumbai-based Telenet Systems has adopted Sequans Communications' new-generation long-term evolution (LTE) semiconductor solutions to build TD-LTE USB dongles and desktop CPEs. The new devices will be used in TD-LTE operator trials and commercial deployments coming in India.

LadyBug announces Indian distributor

LadyBug Technologies has appointed VigVen Tech Mark, Bengaluru as the authorised distributor in India for its entire range of USB power sensors covering average power measurement, pulse power measurement, pulse profile measurement and unique data logger.

offer solutions ranging from concept design, detailed performance assessment and manufacturing engineering. QuEST expects the offshore design centre to scale to over 300 engineers over a period of three years.

Synopsys to acquire Magma

Magma Design Automation Inc. has entered into a definitive agreement to be acquired by Synopsys. The combination of the two companies' technologies, development capabilities, support teams and sales channels will provide chip designers
