

with greater access to state-of-the-art electronic design automation (EDA) solutions that enable more profitable silicon.

Under the terms of the merger agreement, Synopsys will acquire Magma for \$7.35 per Magma share in cash, resulting in a transaction value of approximately \$507 million net of cash and debt acquired. The boards of directors of both companies have unanimously approved the transaction.

Apache Design's software adopted by Fujitsu Semiconductor

Apache Design's Totem software has been deployed by Fujitsu Semiconductor to analyse and optimise all its custom integrated circuit (IC) designs. This includes analogue, memory, high-speed input/output, power management ICs and radio frequency ICs that are used in wide variety of consumer, mobile and communications products.

Totem—a power noise and reliability platform for analogue/mixed-signal chip designs—was selected by Fujitsu Semiconductor for its ability to handle large designs and analyse global noise coupling.

Toshiba to shut three semiconductor factories

Toshiba is reorganising its business and as part of this reorganisation move, the firm is shutting down three of its semiconductor factories in Japan. According to the firm, the manufacturing taking place at these plants will be shifted to other three already existing factories, which will allow Toshiba to strengthen cost competitiveness and focus on higher-value-added products.

According to a company statement, "Toshiba has been accelerating the transfer of assembly and test opera-
