

2.8Ah rechargeable Lithium-ion battery which allows the lamp to glow continuously for 15 hours on a single charge. The head piece of the lamp has three LEDs (one main LED and two auxiliary LEDs), reflector, 3.5mm-thick

polycarbonate light transmitting cover, charging connection and push-type operating switches.

Retrofit PowerLED tubelight

Binay Opto Electronics has introduced a retrofit PowerLED T-5 tubelight with all the drivers and electronics built inside the tube body. It has a slim profile similar to the conventional T-5 fluorescent tubes and hence can be directly fitted into a standard T-5 tubelight strip.

The LED tubelight uses mid-power LEDs. Its total wattage (including driver) is 15 watts. Furthermore, the tubelight is protected against high voltages of up to 300V.

MISCELLANEOUS

Latching relays

Amar Electronics has introduced NRLseries of latching relays that conform to IEC255 and IEC60065 standards. These relays can withstand up to 60A switching capability and come in single-coil and double-coil windings with nominal coil voltages of 9V DC to 48V DC.

Operating over temperature range of -40°C to +70°C, the relays offer

maximum switching voltage of 250V AC/110V DC, operate/release time of 5 milliseconds, creep and clearance distance of 5.2 mm, and insulation resistance of 500 mega-ohms.

Single-board computer

Kontron has introduced a headless version of PC/104-Plus single-board computer (SBC) based on AMD's Embedded G-Series 1GHz processor T24L and fusion controller hub A55E.

The MICROSPACE MSM-eO-N solution is designed for deeply embedded systems that require no display support and graphics features. With up to 4GB DDR3 RAM, storage media can be connected via two SATA interfaces for which RAID 0 and 1 support is available. A socket for microSD cards is also available. Other features include a gigabit Ethernet interface, four USB 2.0 and four serial interfaces (RS232/TTL), application-specific inputs/outputs and eight configurable general-purpose inputs/outputs.
