

Silicon Components Pvt. Ltd.

Beyond Sourcing - Your Knowledge Partner

MICROCHIP product ranges include microcontrollers (PICmicro, dsPIC, PIC24), Serial EEPROM devices, KEELQ devices, radio frequency (RF) devices, thermal, power and battery management analog devices, as well as interface and mixed-signal devices. Some of the interface devices include ZigBee/IEEE 802.15.4, Controller Area Network (CAN), and Ethernet.

8-Bit, 16-bit & 32-bit controllers, Analog and Interface Devices

The common architecture provides users with an easy migration path from 8 to 100 pins among all families with little or no code change required.

- CAMPL / PGA
- Temperature Sensors
- MOSFET Drivers
- Power Management
- Analog to Digital or Digital to Analog Converters
- Interface and Mixed-Signal Devices
- Regulators / LDO & Battery Management
- Memory Products
- Digital Potentiometer
- CAN Solutions, Ethernet, USB
- LCD Solutions, Motor Controls
- Radio Frequency, ZigBee, IEEE 802.15.4, Keeloq Solutions

53 GSM Modem

The 53 is a Cellular modem that operates over the GPRS/EDGE network, offering designers a quick time-to-market and ease of development. It supports both the GPRS packet-switched and the GSM circuit-switched data services.

Features / Unique Advantages:

- Supports 900 MHz and 1800/1900 Bands
- Supports AT command interface, GSM 07.07, 07.05
- Compact size & attractive casing
- Easy integration into existing system via RS-232
- Ruggedized to suit industrial conditions
- Technical support available
- Customization options available
- Intelligent modem design Support
- GPS Modems also available

Can be used for various applications

- Utility meters readings
- Electronic road displays
- Traffic signal monitoring and control units
- On-board vehicle computers for vehicle tracking
- Mobile dispatch and field service
- Surveillance video cameras
- Data logger

Analog Devices Inc. defines innovation and excellence in signal processing. AD's analog, mixed-signal, and digital-signal-processing (DSP) integrated circuits (IC) play a fundamental role in converting, conditioning, and processing real-world phenomena such as light, sound, temperature, motion, and pressure into electrical signals to be used in a wide array of electronic equipment.

- Amplifiers & Comparators
- Analog to Digital Converters
- Digital to Analog Converters
- Embedded Processing & DSP
- MEMS & Sensors
- RF/IF Components and Wireless Products
- Switches/Multiplexers
- Power & Thermal Management
- Broadband / Fiber Optic Products

High-Watt LUXEON LUMILEDS

Solid-State Lighting Solutions from PHILIPS LUMILEDS

LUXEON Rebel LEDs are the Highest Flux LEDs in the world, delivering the brightest solid-state lighting solutions available. They can produce more than 100 lumens per watt and have the highest lumens vs. Wattage ratio. Rebel LEDs are available in various vivid color-sets with different color temperature options available. LUXEON Emitters offer high longevity of more than 10 years of operation.

Silicon Components offers you a wide range of Lighting Solutions based on LUXEON Rebel LEDs. We are One-Stop Shop for your lighting needs. We carry all supporting products like Star MCPS, LED Drivers, Lenses, Collimators, Reflectors, Heat Sink, etc. We also provide design and technical support to help you reduce your time-to-market.

Features:

- Reduced maintenance cost
- Vivid saturated colors - without filters
- Directed light for increased light efficiency
- Robust solid-state lighting
- RoHS-compliant and Lead-free
- Fully dimmable without color variation
- No mercury in the source
- No heat or UV in the light beam

Silicon Components Pvt. Ltd.

102-B, Rassaz Castle, Malja Dongri No.1, Near TCS Compound, Western Express Highway, Andheri (E), Mumbai - 400069.

Fairchild Semiconductor is the no.1 global supplier of power analog, power discrete, and optoelectronic components that optimize system power. As The Power Franchise®, Fairchild offers the industry's broadest portfolio of components for today's leading electronic applications in the computing, communications, consumer, industrial, and automotive segments.

- Smart Power Modules (SPM)
- Insulated Gate Bipolar Transistor (IGBT)
- Power MOSFETs
- Power Switches
- Opto-Couplers

EPM-203-LV Printer

Salient Features:

- Compact Thermal Printer with Controller board
- 2-inch paper width (Other options also available)
- 5-Volt operating voltage only
- Universal ESC sequence compatible
- Complete text and graphic printing
- Supports Serial RS-232 interface
- Option to customize fonts and graphics
- Inbuilt over-temperature & voltage protection
- Programmable printing speed up to 50 mm/sec
- Attractive body casing
- Bluetooth integration possible

Applications:

- Portable printers and terminals
- Taxi meters
- Ticket Printing
- Weighing machine scales
- Hand-held terminals
- EFTs (electronic funds transfer)
