

Advanced Design

Snubber Capacitors for IGBT Modules

choose from a wide range

- Voltage rating 850 VDC (450 VAC) to 3000 VDC (750 VAC)
- Low inductance and ESR
- High dv/dt
- Low loss polypropylene dielectric with and without self-healing
- Designed for IGBT protection circuits
- Wide range of terminal styles to suit varied IGBT modules
- Ideal for energy conservation and control in power electronics circuits
- UL 94 VO and ROHS compliant
- Custom designed capacitors available

Registered by UL to ISO 9001

34-B, MIDC Industrial Estate, Satpur, Nashik - 422 007, India.
