- Memory: 156MB internal and up to 32GB external (microSD)

Price: ₹ 9999

input is not your choice, select a phone which has a slider keypad because such phones have a bigger screen.

Handset compatibility. Check whether the phone is just 3G- or 3.5G-compatible. 3G handsets download and upload data at speeds up to 384 kbps. 3.5G-compatible phones, also known as HSDPA-enabled phones, offer up to 3.6Mbps download speed and up to 384kbps upload speed. So go for a 3.5G handset if you want faster Internet access.

Processor. Smartphones feature computer-like capabilities, from desktop-like Internet browsing to HD video playback. Faster processor means faster processing speed for your mobile. There are different processors being used in the phones including ARM, Cortex A8, Snapdragon, Tegra, OMAP and Armada.

Storage. With an increasing number of applications and faster downloadable

Some 3G protocols

- Universal mobile telecommunication service (UMTS)
- Wideband code-division multiple access (WCDMA)
- High-speed downlink packet access (HSDPA)
- Evolution data maximised (EVDO)

speeds, you need a good amount of storage space in your phone. Check out the phone's inbuilt as well as the expandable memory.

Battery. Accessing various applications and being logged in to the Internet all the time obviously consumes more power. Many a times, what the manufacturers mention is the standby power consumption of the phone or the battery that the phone consumes while simply making calls. Once you have chalked out a few models that you like, find out
