

million by the end of 2012—according to a report by ABI Research.

Senior analyst Josh Flood said, “A number of consumers had held off from computer purchases so they could purchase an ultrabook with Windows 8 during the year. Furthermore, with the abundance of new ultrabook model releases, older system prices will reduce and this will entice purchases from the low- to mid-range price segment.”

North America is currently the largest market for ultrabooks with half the world's shipments.

Sony, Toshiba set to increase chip spending in 2013

Despite weak financial results, Japanese consumer electronics original equipment manufacturers Sony and Toshiba are expected to increase their semiconductor spending over the next two years.

“All the Japanese consumer electronics OEMs are struggling financially, which is prompting them to take measures to cut costs in order to shore up their profits,” said Myson Robles-Bruce, senior analyst for semiconductor spending and design activity at IHS.

“But even in these grim circumstances, Sony and Toshiba remain optimistic about the future, and are taking steps to invest in innovative products. This will cause their spending on semiconductors to rise in the coming years.”

BIS registration mandatory for sale of 15 electronic products

The Department of Electronics and IT (DeitY) has issued the Electronics and Information Technology Goods (Requirements for Compulsory Registration) Order, 2012, bringing into force a scheme for mandatory regime of registration of 15 electronic products so that these products meet specified safety standards. These electronic products include video games, laptops/notebooks/tablets, plasma/LCD/LED TVs, microwave ovens, printers and scanners, telephone answering machines, set-top boxes, etc.
