

3G Tablet

WishTel's IRA Icon HD features advanced 3D graphic enhancers and multimedia, connectivity, and computing capabilities with a range of essential ports

WishTel has added a new model to its range of tablets, IRA Icon HD. Featuring a 20.3cm (8-inch) TFT LCD multitouch capacitive touchscreen, the tablet runs Android 4.0 (aka Ice Cream Sandwich) operating system. Powered by a 1.2GHz processor coupled with 1GB RAM, it supports 3G, Wi-Fi, HDMI and Bluetooth connectivity. The inbuilt 3G SIM slot supports voice calling from the tablet.

The tablet also has a 2MP rear camera and a 0.3MP (VGA) front camera, and displays HD content at 1080p resolution. The 8GB internal memory is expandable up to 32 GB.

The tablet is powered by a 4000mAh battery, which allows browsing time of about six hours. It comes bundled with wireless headphone, WLAN to USB port cable and card reader. The tablet provides access to over 500,000 free/subscribed books on WishLibrary and Bollywood and entertainment content on Wish Studio.

Price: ₹ 12,999

3D Projectors

Epson's EH-TW6100 and EH-TW8100 support all 3D formats without the need for additional hardware

Epson has introduced next-generation 3D projectors in India, EH-TW6100 and EH-TW8100. Both the projectors are full HD 1080p capable, and are claimed to deliver the brightest 3D images of any projector in the world, thanks to their Epson 480Hz frame refresh rate that is twice as fast as other 3D projectors'.

The projectors support all 3D formats without the need for additional hardware. In addition, these use radio-frequency-based 3D glasses that comply with the new Full HD 3D Glasses industry standard.

The main feature that differentiates TW-8100 from TW-6100 is its lens shift capability that optically corrects distortions if the projector is placed off centre from the screen. This allows users to place it anywhere they wish to with no compromise on image quality.

Price: EH-TW6100 - ₹ 130,099
EH-TW8100 - ₹ 170,099

SmartPod for TV

The Woxi Media SmartPod for TV converts your television into a smart device with Enhanced Android featuring multi-user login capability

Woxi Media has launched SmartPod for TV—a small box that connects to virtually any TV and converts it into a smart TV. SmartPod is built with Enhanced Android, which is optimised for lean-back TV experience and family-oriented multi-user environment around home TV, supporting up to eight unique users on the device. It features Woxi's AppCasts technology that delivers hundreds of different Internet content channels from the cloud to your TV with no individual apps to download.

SmartPod includes a gaming RF remote control with built-in gyros and sensors to enjoy Android motion games. The remote also features an elegant QWERTY keyboard for easy Web browsing, searches, Twitter and Facebook usage.

The device features Full 1080p HD video, HDMI 1.3 interface, and Composite video interface for standard definition TVs. It is powered by dual processors—a 1GHz ARM Cortex A9 coupled with a 400MHz Mali 3D Graphics processor. It connects to the Internet via WiFi or Ethernet. Also, it has storage capacity up to 32 GB using a plug-in SD card, and 1 TB or more using external USB hard disk drive.

Price: ₹ 9499 (inclusive of remote and all other accessories)
