Gemalto wins award for LTE R&D

Gemalto has bagged the Best Contribution to R&D for LTE award at the LTE World Summit 2012. This is the third consecutive recognition for Gemalto at LTE World Summit, following the Best Contribution to LTE Standards and Best Enabling Technology awards won in 2011. In the US, Gemalto also received the Most Innovative Network Deployment at 4G World 2011.

developed by the IIT-Bombay team over the last five years.

Jakson forays into solar power

Jakson Group has announced its foray into the solar power sector as an independent power producer. The group has bagged two projects of 10 MW each by National Vidyut Yapaar Nigam (NVVN) under the Jawaharlal Nehru National Solar Mission.

Jakson has entered into a 25-year electricity sale agreement with NVVN to feed electricity for the grid. The power generating facility located in Rajasthan will be a large-scale project

design contest in India. The contest aimed at inspiring and challenging top design engineers across the country to demonstrate their skills and innovation to drive the future of electronics. It saw participation of more than 1200 teams including companies, design houses, engineers in individual capacity and hobbyists across India. The top 120 teams were provided with TI microcontroller toolkits and access to TI experts' advice throughout the design development phase.

Team Maven, comprising Dnyandeep Buwa and Suhas Jain from Maven Systems, won the first it-

Solar panels

supplying stable supply of power to the grid.

Jakson is also planning to provide EPC contracting services to other developers and establish manufacturing facilities for solar power generation equipment.

TI MCU design contest concludes, Team Maven wins

Texas Instruments (TI) recently announced the winners of its first MCU

eration of the contest conducted this year. The team won a prize of \$15,000 and the TI MCU Design Contest shield for its wireless security hub project.

TCS to hire 60,000 freshers

Tata Consultancy Services (TCS) plans to hire about 60,000 freshers during FY 2012-13. The company has already made campus offers to as many as 43,604 students in the

current fiscal, covering 389 colleges across India.

Latest statistics revealed by the company indicate that TCS saw a growth of 7.3 per cent in the employment of non-Indian nationals during the year 2011-12. The number of non-Indian national employees was about 5.9 per cent in 2009-10, which increased to 6.9 per cent in 2010-11. TCS now has a non-Indian employee base of 17,329, which has considerably increased from 9536 in 2010.

Intel to power 20 Windows 8 tablets

Reasserting that Ultrabooks are not taking the company's attention away from the tablets, Intel recently revealed that its partners are working on over 20 tablets that run Windows 8 operating system and are powered by Intel's Clover Trail processor.

Intel aims to encash tablet-flavoured Windows 8 OS, which has been optimised for a touch experience. The Clover Trail-based tablets are likely to be less than 9 mm thick and weigh less than 680 grams.

Samsung contemplates \$1.9-billion logic chip line

Seeing the global outcry for smartphones and tablets, Samsung is all set to build a logic chip line worth \$1.9 billion to make processors for mobile devices. The new line will use 300mm wafers, and 20nm and 14nm processing technologies. The South Korean company further plans to establish a NAND-type flash memory chip manufacturing unit in China.

According to research firm Gartner, the demand for system chips is expected to more than double to \$59 billion in 2016 from \$23 billion in 2011. Samsung is rigorously working on the production of logic chips to cater to this demand.

At present, Samsung is producing application processors for Apple's iPad and iPhone, which pose a fierce competition to its own products Galaxy and Note.
