Digital EFY

Hearty congratulations to EFY for its e-zine (digital) version! The design is very good and the way we can flip the pages using mouse is like turning the pages in the paper magazine. I request you to include 'Compliments' option under 'Feedback' button of the e-zine. Keep up the good work!

Obstacle-Avoiding Robot

I want to assemble an accident-avoiding robot car that can detect obstacles in its path. Please tell me whether any 89V51-based circuit for such a robot has been published in EFY. Also, tell me how to interface distance sensor in this circuit.

Pravin Kothari
Through e-mail

EFY: You may refer to the AT89C52-based robocar project published in EFY Nov. 2009. This robot car detects obstacles and manipulates its direction as per the inputs from three infrared sensors mounted in front of the car. AT89C52 and 89V51 are 8051-compatible microcontrollers. The project can be purchased online from www.efymagonline.com website.

Converting from EFY to EFY Plus

I am a subscriber to EFY and would like to know:

1. How to get the source codes of construction projects published in the magazine?
2. How to upgrade my EFY magazine subscription to EFY Plus?

Nausha Deshpande S.
Bengaluru

EFY: 1. You can download the source codes of published construction projects from www.efymag.com website free of cost.

2. For upgrading the subscription to EFY Plus, please contact our circulation team on support@efyindia.com with your subscription number.

Source Code Download

Please tell me how I can get the source code of 'PIC16F877A-based Tempera-

ture Monitoring System' project published in EFY May 2010 issue.

Arthur McKellar
Through e-mail

EFY: You may download the source code from www.efymag.com website free of cost. The link for download is: www.efymag.com/previousissue.asp?month=May&year=2010&tot=1&id=12

Projects Based on Microcontrollers

www.electronicsforu.com is very useful to the beginners as well as hobbyists. It is a very encouraging platform to learn but I think there is a shortage of circuits based on microcontrollers. I suggest you to include more projects in microcontrollers category.

D. Naveen Reddy
Hyderabad

EFY: Thanks for the feedback! Microcontroller-based projects are now included in almost every issue of EFY. You may also refer to 'Microcontroller Based Projects' book published by EFY. The book can be purchased from EFY associates Kits'n'Spares (e-mail: info@kitsnspares.com).

Solar Charger Kit

I want to purchase the 'Microcontroller-based Solar Charger' kit. Is it available from EFY Hyderabad?

P. Tarun
Through e-mail

EFY: You may contact EFY associates Kits'n'Spares on info@kitsnspares.com or their dealer Roland Electronics (address: 4-3-345/5, Gujarati Galli, Bank Street, Hyderabad; phone: 4756823, 9849070411) to get the solar charger kit.

Guitar and Microphone Amplifier

In the circuit 'Guitar and Microphone Amplifier Using TDA2005M' published in May issue, can I use LM1875 in place of TDA2005M as LM1875 too outputs 20 watts at 1 ampere? TDA2005M needs 3A current. So the power supply will be bulkier than with LM1875, which needs only 1 ampere for the same output.
