

MICROSTRIP And MICROWAVE LAB SETUP

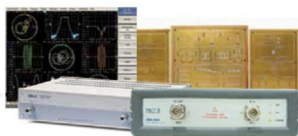

Knowledge of Microstrip Component is essential for understanding RF and Microwave technology. Here we provide a comprehensive package of active and passive circuits. This lab fulfills the need to make this technology accessible to the students by giving them hands-on experience which helps in realization of the physical significance of the theoretical aspects.

BASIC MICROSTRIP SETUP

MCT-B and TR-1300/1

ADVANCED MICROSTRIP SETUP

MCT-A, SNA 2550 and 304/1

The Basic Microstrip Setup consists of MCT-B Trainer Kit along with PC based Vector Network Analyzer (TR 1300/1) upto 1.3 GHz. Ideal for introduction to Microstrip technology and S-parameter analysis using Vector Network Analyzer.

The Advanced Microstrip Setup consists of MCT-A Microstrip Component Trainer Kit along with PC based Vector Network Analyzer (TR 304/1) upto 3.2 GHz. Designed for practical hands-on teaching solution for RF and Microwave Fundamentals using both passive and active microstrip circuits. The MCT-A Advanced Microstrip Component Trainer Kit is also compatible with 2.5GHz Scalar Network Analyzer (SNA-2550) and 3GHz Spectrum Analyzer (GSP-830TG).

These analyzers offer an excellent low cost solution for performing full range of magnitude and phase measurements. Characterize your circuits for return loss, insertion loss, VSWR, Smith Chart, phase, group delay, transformation between frequency domain and time domain mixer/converter measurements and other state-of-the-art analysis methods.

MICROWAVE BENCH

The Microwave Bench Setup introduces students to all the concepts of microwave transmission. This bench helps students study various components and their parameters used for microwave communication, which is designed to operate in the X-band. All precision built components used in the bench are tested on a Network Analyzer for un-paralleled performance. Flexible packages are designed for institutes to build basic set-ups that can be gradually upgraded to an advanced one, merely by adding the various modules that are offered.

Dealers active in Engineering colleges, Polytechnics, ITI's and other Technical Institutions, willing to work with us may write to - director@falconindia.biz
