

IRO 2012
Indian Robot Olympiad

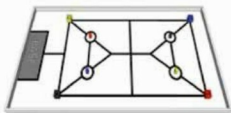

Are you ready for **IRO 2012?**

ROBOTS

CONNECTING PEOPLE

Robots which can be integrated into our everyday lives, socialize with people, and perform complex tasks for them have been the stuff of Science Fiction dreams.

To do that, Robots need to possess the ability to learn and acquire artificial intelligence by themselves, but more importantly they first need to "know" how humans function both as an individual and in a society.

competition play field

Winners of IRO 2012 get a chance to represent India at the **WORLD ROBOT OLYMPIAD** at Malaysia... www.wroboto.org
