Sony	Xperia Mini ST15i	Touchscreen	1 GHz	7.6 cm	Android 2.3	5 MP	320 MB/32 GB	3G, Wi-Fi, a-GPS, DLNA	1200	Rs 12,099

Memory

We all love to store music, videos and apps in our smartphones, though the extent of usage varies from person to person. All this data is stored either in the internal memory of the phone or the external memory, which is expandable via a microSD card. Raising the bar, many smartphones give internal storage capacity of up to 8 GB, further expandable up to 32 GB.

BlackBerry Curve 9220 smartphone

Even if the smartphone of your choice offers internal memory in megabytes, you still have a reason to cheer. Leaving aside the ones with large internal storage, it is quite certain that you will get a free 2GB or 4GB card shipped along with the smartphone.

Camera

Most of the smartphones available in the market have at least a 5MP camera. The camera is likely to offer features such as auto-focus, LED flash, geo-tagging and HD video recording. Upholding the high-definition (HD) trend, many also give the option of HD video recording at 720p. Raising the stakes further, some companies are providing an 8MP camera in their smartphones.

Nokia's N8 that raised eyebrows by offering a 12MP camera has now been overshadowed by its elder cousin called the Nokia 808 PureView. The latest flagship smartphone from Nokia sports a whopping 41MP camera, but comes at a steep price.

Connectivity

Though all phones feature GPRS and EDGE, these connectivity options are now passé! 3G and Wi-Fi can be found in almost all smartphones these days. Also, there are phones that offer the added facility of clubbing various devices with them. For instance, with Digital Living Network

Alliance (DLNA), you can pair your DLNA-enabled devices such as computer, camera, printer and display panel to your smartphone for sharing digital media between them. Similarly, you can watch the HD content stored in your smartphone on a large LED/LCD screen via an HDMI-out port. Additionally, a-GPS can be of some great use in finding the correct route to your destination. ●
