If you can dream up a robot design, you can build it with the TETRIX™ Robotics Design System

TETRIX is a complete design system for engineers who are serious about Robotics. Featuring heavy-duty aluminum elements for construction of robotic components, powerful drive motors, and expandable capabilities, TETRIX provides the ideal platform for creative robot design and building. Combine TETRIX with LEGO® MINDSTORMS® Education and take robotic creations to the next level with unlimited possibilities! Use the new Hard Point Connector to link TETRIX parts to the LEGO Technic elements in the MINDSTORMS set, including the NXT Intelligent Brick and sensors, and be off to the races with autonomous robotics.
