

Smart TVs

With Panasonic's Smart VIERA Flat-Panel TV, you can watch a live broadcast and Skype at the same time

Panasonic has introduced a new range of SMART VIERA flat-panel televisions ranging in size from 61 cm to 140 cm (24 to 55 inches). Select models in this range feature new smart applications that allow users to interact with their Smart VIERA TV.

For instance, using the VIERA remote app, you can stream content to your TV straight from your smartphone with a single swipe of your hand. The browser supports HTML5 pages, so you can browse the Internet much like a PC. The large screen allows your whole family or a group of friends to comfortably view

Price: ₹ 13,990 to ₹ 320,000

a wide variety of content. Also, you can stay in touch with your friends through Twitter or Facebook timeline, which gets displayed on the side screen while watching TV. Sports fans can chat with friends as they watch live games unfold. You can either use your smartphone or a Bluetooth compatible keyboard as a remote control for writing text.

Cinema 3D TV

LG's 55LM8600 comes with a computer mouse-like remote

The 140cm (55-inch) 55LM8600 3D TV from LG with a narrow bezel design, giving a true full-screen image. It supports a frame rate of 240 frames per second (fps), enabling flicker-free and crosstalk-free images.

Price: ₹ 265,000

The three-mode remote supports motion control, gesture control and a wheel mouse. Intel's WiDi (Wireless Display) technology allows you to connect your laptop to the TV and play content on it. The TV supports Internet speed of up to 72 Mbps. Through Smart Share Plus, users can access content stored on external devices such as PCs and tablets.

Other features include 3D depth control, 3D mismatch correction and 2D-to-3D conversion. Using special glasses and the Dual Play function, gamers can view the complete screen in dual-player mode rather than a split screen.

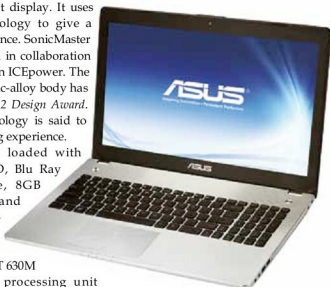

Multimedia Laptop

Running on Intel's Ivy Bridge processor, the high-end ASUS N56VM excels in audio and video performance

Asus N56VM laptop is powered by Intel's Core i7 processor (Ivy Bridge) and has a 39.6cm (15.6-inch) full HD LED-backlit display. It uses SonicMaster technology to give a good sound experience. SonicMaster has been developed in collaboration with Bang & Olufsen ICEpower. The laptop's original zinc-alloy body has won the Reddot 2012 Design Award. Video Magic technology is said to enhance the viewing experience.

N56VM comes loaded with SATA 750GB HDD, Blu Ray 4X Combo drive, 8GB 1600MHz DDR3 and 2GB DDR3 video memory. The newly-introduced NVIDIA GeForce GT 630M discrete graphics processing unit makes a world of difference when it

comes to smooth visuals. Asus Super Hybrid Engine II technology provides two-second instant resume.
