

# Great Performance & Value of Virtual **VNA**

- Full range testing of magnitude & phase upto 8 GHz.
- Frequency & time domain analysis with time domain gating.
- Frequency offset mode.
- Electrical delay.
- Higher display & marker resolutions.
- Familiar graphical user interface.
- Economical solution

## Vector Reflectometer

- Designed for  $S_{11}$  parameter measurement.
- Frequency range: 85 MHz to 4.2 GHz
- Measures magnitude phase of reflection coefficient, cable loss & DTF.
- Powered via USB interface.
