

## Cloud Router

D-Link DIR-605L is a no-frills router with steady performance and good range

The DIR-605L from D-Link provides 300Mbps 802.11n wireless networking but has no dual-band wireless (only 2.4GHz), no Gigabit Ethernet or USB ports. The router supports port forwarding and triggering, dynamic DNS, UPnP, etc. The function 'Parental Control Rules' lets you define a list of sites that users can access.

The wireless range is good due to use of dual antennae. For cloud integration, the router is mydlink enabled, which is D-Link talk for a device that supports its cloud service.

The setup is simple. You can simply join the default wireless network or connect via LAN cable and follow the Web-based setup to configure your network.

## 3D Projector

BenQ W7000 can be connected to Blu-ray players and video game consoles that support 3D content

The BenQ W7000 3D projector supports stereoscopic 3D. It can be connected to Blu-ray players and video game consoles that support 3D content. The lamp is capable of a brightness of 2000 ANSI lumens, which is sufficient for a good picture quality even in ambient light. The contrast ratio is 50,000:1.

The projector features image processing enhancements such as Texas Instrument's DynamicBlack and Philip's VIDI lamp for better contrasts. Frame interpolation

provides smoother motion for fast-moving scenes. The lens features a wide-range shift, which reduces image distortion when the projector is placed off-centre. The projector is capable of displaying 2.35:1 wide screen.
