

MEDI 8-Phase Interleaved MPPT Solar Charger

MEDI, Established in 1987, Pioneers in Analog, Digital, Power Electronics, Microcontroller, DSP and RF designs

Features * 35% more current compared to panel directly connected to battery / with ordinary charger. Because of eight phased interleaved switching topology, MOSFET switching at 20KHz will give a resultant output frequency of 160KHz. This reduces the switching loss, reduces input/output ripple, equal current sharing in MOSFETs * CCCV battery charger with temperature compensation * Circuit suitable for battery from 12V to 240V and panel voltage from 12V to 440V * USB/RS485/RS232 interface for detailed data logging with voltage and current of battery and panel, energy produced every hour/day/month. Internal RTC and flash memory for storing data with time/date/month/year details up to one year * Design suitable up to 10KVA.

Approx. BOM of 5KVA MPPT solar charger: Rs.8000. Technical know-how cost up to 10KVA: Rs.7 lacs.

Other Technical Know-How

IGBT based PWM type STATIC VOLTAGE STABILIZER up to 70KVA single phase and up to 200KVA 3-Phase.

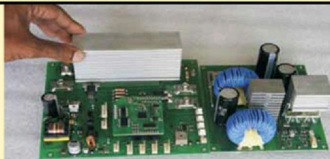

BOM (50KVA) Rs.45,000

Technical know-how cost – Rs.11 lacs

300VA-3KVA DSP sinewave inverter – Rs. 1.7 lacs

3-Phase sinewave inverter up to 30KVA.

Technical know-how cost – Rs. 5 lacs

Want to make your own Electronic Projects? Now Available

608 Construction Projects
and 1671 Circuit Ideas
all tested at EFY, with CD

Also
