

NEW!

Modular Switching Regulator R-78E for less than U\$1.98*!

Key specifications:

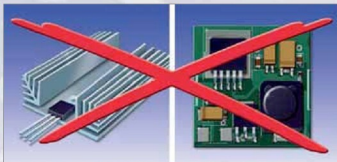

- ✓ Drop-in for 5V/0.5A LM78
- ✓ Up to 92% efficiency
- ✓ 7 to 28V input voltage
- ✓ Short circuit and overload protection
- ✓ Three year warranty

* for production volumes

The pin configuration of the R-78E is compatible with that of other 78-series switching regulators and with TO-220 linear regulators. Excellent efficiency (92%) is achieved at 5V/500mA. The device measures only 11.6 x 8.5 x 10.4mm and can be operated without a heat-sink at temperatures of up to +85°C. Making your own is no longer warranted!

With this efficient
low cost module,
making your own
no longer pays off!

Linear regulators convert more than 50% of the energy into heat and need to be operated with a heat-sink.

Purpose-built linear regulators are rarely the optimal solution.
