

DSO-050CS

50MHz 500MS/s with FFT Analysis and 28 Math functions

- Real time sampling rate up to 500MS/s
- Dual channel
- LCD colour display up to 7"
- 28 Automatic measurements
- Saving 10 waveforms and 10 setup parameters
- Convenient USB port interface for computer and USB host
- 1024 FFT acquisition points

FG-20DDS

20 MHz DDS Function Generator at an unbelievable price

- DDS technique with frequency stability and high resolution
- High speed digital circuit and D/A converter
- 9 function waveform
- High resolution : 0.1 μ Hz, 8 digit display
- PC interface(R232)
- Instrument control via instruction set
- Large screen back light LCD display menu driven
- Frequency sweep FSK, ASK, P5K and burst

Dealers active in Engineering colleges, Polytechnics, ITI's and other Technical Institutions, willing to work with us may write to - director@falconindia.biz
