

Multi-featured Bluetooth Headphone

Zebronic Blue Air has in-built microphone and noise-isolation capability

Taking voice calls and listening to music for longer hours becomes a pleasant experience with Zebronic Blue Air multi-featured Bluetooth headphone. Blue Air has an in-built microphone, which allows you to make hands-free calls. It is also capable of noise isolation, which enables you to hear calls clearly in noisy areas.

The headphone works in the frequency range of 20 Hz to 20,000 Hz, and has an operating range of up to 10 metres (33 feet). A single charge provides up to 14 hours of audio playback and up to 200 hours of standby time.

Standard accessories include a USB charging cable and charging adaptor and an audio cable for using the headphone as a wired headset.
