worth \$518 million in 2011 and, by 2016, should be worth nearly \$1.3 billion—a CAGR of 20 per cent.

Gujarat set to become solar energy hub

Fifteen solar projects were dedicated to the nation on April 19, at the Charanka Solar park in north Gujarat. According to Gujarat chief minister Narendra Modi, these solar projects have a capacity to produce 650MW power. Modi, while talking to a group of Solar Power Developers Forum, also shared

that Gujarat is all set to become the world's solar energy capital.

All 15 projects have been completed in a record time of 16 months, according to a PTI report. The state government is also working on a solar energy policy, which is likely to be launched soon.

"We have already sent a letter to the Prime Minister to develop a system along the 1500km India-Pakistan border to not only produce power but also put in place a solar-powered defence mechanism," Modi added.
