

"The collaboration with Dolby, the global leader in technologies that are essential elements in the best entertainment experiences, would thus enable HP to tap into this very need and offer superior entertainment experience to consumers at affordable prices," he added.

RIM offers free trial of BlackBerry phones in Tamil Nadu

Aiming to attract a number of young consumers in the country, Research In Motion (RIM) has launched a new scheme in Tamil Nadu circle offering free trial of its BlackBerry smartphones.

RIM's BlackBerry

"All you have to do is get a BlackBerry phone with a data service plan, and if you are happy with the device after using it for two months, you can go ahead and buy it. And if you are not happy, the company will take back the device without any grudge," Amit Mathur, director, channel sales, India, RIM, told *Business Line*.

RIM has partnered with Airtel in Tamil Nadu circle. Earlier, the company had introduced such a scheme in the Delhi circle without the data plan. The best part about the new scheme is that you can use all the services and applications that come with the data plan, including Internet browsing and use of e-mail and BlackBerry Messenger services, for free.

Samsung steals mobile phone crown from Nokia

According to a poll of analysts conducted by Reuters, Samsung Electronics ended Nokia's 14-year leadership of the global cellphone market in the first quarter of the year, outselling the latter for the first time ever. Analysts, on an average, expect Samsung to have sold 88 million cellphones from January to March, surpassing the 83 million sold by Nokia. The fall of the Finnish firm has been rapid over the last few months as in a similar poll in January it was still expected to stay far ahead of Samsung.

Nokia tops multi-SIM segment

A recent study published by research firm Nielsen reveals that in the multi-SIM segment in India, Nokia is the top brand in handsets, while Airtel tops the service provider category. According to the study, nearly a third of 71 million Indian subscribers using multiple SIM cards own dual-SIM phones from Nokia.

Toshiba marks 25th anniversary for NAND Flash technology

Year 2012 marks the 25th anniversary of Toshiba's invention of NAND flash memory. The commemoration of the anniversary will continue throughout the year. Included in the celebration will be notable industry events, consumer participation, and an interactive campaign that embraces industry voices and experiences exploring the impact of NAND flash.

Loop Telecom shuts down operations in India

Loop Telecom, whose 2G licences were among the 122 telecom licences cancelled by the Supreme Court, is in the process to shut down its business in India. "We have no option. The company has already advertised in newspapers for shifting our customers on other network through mobile number portability," a Loop Telecom spokesperson said.

Matrox Graphics announces new distribution opportunities

Matrox Graphics, which deals in specialised multi-display graphics solutions, is actively seeking additional distributors in India and Pakistan to promote and market its products. It offers a line of multi-monitor solutions, including M-Series and Epica graphics cards, DualHead2Go and TripleHead2Go external adaptors, Avio and Extio KVM extenders, and Mura video wall controller boards.

iRobot to use TI processors

Texas Instruments (TI) and iRobot Corp., a robotic technology-based solutions company, have partnered to develop robotic technologies using TI's smart multicore OMAP platform. The two companies aim to create intelligent and practical robots capable of enhancing people's lives. They plan to achieve this vision by leveraging iRobot's long history in advancing the field of robotics and TI's strength in applications processors and related technologies.

To date, iRobot has sold more than 7.5 million home robots worldwide. More than 4500 combat-proven government and industrial robots have been delivered to military and civil defence forces worldwide.

Infosys to hire 10,000 engineers

Infosys is setting up a new campus

in the upcoming Technocity technology park in Trivandrum. With a total investment cost of Rs 10 billion, the facility will create employment for 10,000 engineers. It will also generate another 50,000 indirect employment opportunities.

"The projected exports from this SEZ campus would be of the order of Rs 15 billion over the next five to eight years," Business Line said in a report.

Infosys has two development centres in Technopark located adjacent to Technocity, housing another 4100 professionals. The Trivandrum centre is the fastest growing centre of Infosys across the country at 30 per cent annually. For year 2012-13, Infosys has plans to add another 3500 engineers in the existing campus at Technopark Phase-II, thus increasing its exports to Rs 8 billion.
