

Conformal coatings of the series

ELPEGUARD®
PETERS

SL 1301 ECO-FLZ

- good protection against corrosion
- very good dielectric properties and very high tracking resistance
- approved and used by leading suppliers of the automotive industry
- can be removed for repair purposes
- fluorescent

Conformal coating spray

SL 1407 FLZ-S

List of Published Projects

I have been a regular reader of EFY for the past year. I want to make a project using Radar or Sonar system. Where can I get the related information? I also request you to send me the list of all the projects published in EFY from the time of its first publication.

Manoj Mahto
Through e-mail

EFY: We do not have projects based on Radar or Sonar. You can view the list of projects published in EFY from the table of contents in *Electronics Projects* Vol. 1 through Vol. 25 from the link: <http://kitsnspares.com/user1/buy-product.asp?id=7>

Over-Speed Alarm

Has anyone tried building the 'Over-speed Alarm For Two Wheelers' circuit published in May 2011 edition of EFY? I am facing some problems. The output of IC LM2917N at pin 10 is not coming as desired. The circuit is working only up to the output of LM358.

Bhuvan Raj

EFY: If you are checking the output with a multimeter, it will not display proper voltage level at pin 10 of IC3. You will get only pulses which you can observe from an oscilloscope. Here are some tips to troubleshoot the problems:

1. Ensure proper power supply.
2. Adjust VR1 such that LED1 glows bright.
3. Feed 6 Hz at pin 2 of IC2. You can also generate 6Hz signal using 555 timer. As per relationship, 6 Hz equals 40 kmph.
4. Adjust VR2, VR3 and VR4 such that you hear sound from the speaker.
5. Now fix the magnet and Hall sensor on the front wheel of the bike as described in the article.

CAREERS:

Let Automation Take Control

The 'Let Automation Take Control' article by Uma Gupta in EFY Dec. 2011 issue was really good for students like me to get the right direction for entry in the industry.

Corakh Baviskar

☐ The article is very useful to a graduate who wants to advance his career in the field of automation. Thank you!

Snowben Mascarenhas

☐ This article is really good. I graduated from the electrical & electronics engineering stream this year and am looking for a job. Will this field be beneficial for me?

Kartik Sishodiya

☐ I will complete my graduation in electronics & communications engineering in May. Which fields should I consider so that I can make a move towards the automation industry?

Sharad

EFY: You could go through the 'Industrial Automation' category on <http://jobs.electronicsforu.com> to view the opportunities.

DO-IT-YOURSELF PROJECTS:

RFID Based Security System

The 'RFID Based Security System' construction project published in EFY Dec. 2010 is a good example of RFID application.

Sandeep

☐ How can I make the tag used in this project?

Kapil

Mayur: You need not make the tag yourself. When you purchase the RFID reader module (EM18), you will get the tag too. Each tag costs not more than Rs 10-15.

☐ I am planning to assemble this project. What would be the estimated cost of this project?

M. Iswariya

EFY: Please contact EFY associates Kits'n'Spares on 011-26371661 or info@kitsnspares.com to get the details like price and mode of payment.
