

Android Media Player

Running on Gingerbread, the Limebox can play 1080p Full HD videos as well as music and photos of almost every format

Limebox Android Internet Media box from Portronics runs on Android 2.3 OS (Gingerbread) and plays Full HD videos. It comes with 4GB memory storage, network connectivity via Ethernet port and in-built Wi-Fi. The device can also play music and photos of almost every format, and run Microsoft PowerPoint, Excel and Word programs.

Price: ₹ 8500

You can surf the Web using any wireless keyboard or watch YouTube videos. The player features two USB ports, allowing you to connect USB storage drives to access and play the stored media. It also comes with an HDMI port to connect to an HDTV, while AV output is provided for analogue televisions.

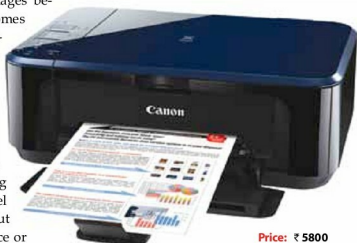

Multifunction Printer

Canon PIXMA E500 lets you add fun effects to the images being printed

Canonical PIXMA E500 is an easy-to-use printer with decent print quality and fast printing speed. It can also scan and copy. The printer allows you to print HD movie frames and add five fun effects to the images being printed. It comes with two cartridges—black and tricolour. The print tray can hold up to a hundred sheets. Up to nine copies can be printed using the control panel on the device but you cannot reduce or

enlarge them. The print cost is Rs 2 per colour copy.

The scanner is flatbed type and can scan documents as large as A4 size. The hardware resolution of the scanner is 1200×2400 dpi.
