

TABLE I
Minimum Resolution Required for Different Print Sizes

Maximum print size	Minimum MP	Resolution
10.2 cm x 15.2 cm (4" x 6")	2 megapixels	1600x1200
12.7 cm x 17.8 cm (5" x 7")	3 megapixels	2048x1536
20.3 cm x 25.4 cm (8" x 10")	5 megapixels	2560x1920
27.9 cm x 35.6 cm (11" x 14")	6 megapixels	2816x2112
40.6 cm x 50.8 cm (16" x 20")	8 megapixels	3264x2468
40.6 cm x 61 cm (16" x 24")	12 megapixels	4200x2800

TABLE II
Number of Different-Resolution JPEG Images* That A Memory Card Can Carry

Memory card capacity	1 GB	2 GB	4 GB	8 GB	16 GB	32 GB
8-megapixel	270	540	1080	2160	4320	8640
9-megapixel	255	510	1020	2040	4080	8160
10-megapixel	225	450	900	1800	3600	7200
12-megapixel	200	400	800	1600	3200	6400
15-megapixel	150	300	600	1200	2400	4800

*Exact number will vary from camera to camera and image compression settings

The built-in memory of a 10MP or above digital camera is only a few megabytes, which gets exhausted in a few clicks. If you are in the 'click-and-capture' habit, you certainly need removable storage memory. SD, SDHC and SDXC memory cards are the most prevalent forms of removable storage memory available commercially. A memory card of at least 4 GB comes complementarily with almost all camera models.

Avoid using up the memory

Canon Powershot A2200

before buying one.

Shutter speed

Digital compact cameras have a 'shutter' that is opened for a precisely measured period of time, allowing light to pass through when a picture is taken. The shutter speed can be adjusted between a few seconds and a few thousandths of a second. You need not entangle your mind in these minute calculations, as most point-and-shoot cameras set shutter speeds automatically. Under normal daylight conditions, the shutter speed will be set at around 1/125th to 1/1000th of a second.

Video recorder

Besides capturing still images, most compact digital cameras feature a

to its capacity. If your memory card can hold a thousand JPEG photos, try to shoot up to 950 images only. Keeping some empty space will reduce the chances of the memory card getting corrupted. If your memory card is running out of space, lowering the image resolution can give you as much as twice the extra space needed to capture important snaps. If you still need additional memory, a 16GB memory card would cost you under Rs 1000. Check the expandable memory of your digital camera
