will not fill up the entire disk; it only will mark its territory up to the edge of 32 GB or 4 GB.

Overclock. Change/trim the display portion. In case you see the display centered at the middle, select this option.

Overclock. The default speed of Raspberry Pi is 700 MHz. You can increase the clock frequency up to 1 GHz but that's really an expert's job. For the time being, leave that option.

Ssh. This enables or disables 'ssh' server. Bring the cursor above it and then press 'Enter.' It will start 'ssh' server, which by default is 'off.' 'ssh' server will help Raspberry Pi get connected over a network and run it headless.

Every time you make any changes here, you have to reboot the computer for the changes to take effect. This time, before reboot, open the SD card, put it into the card reader and dump some MP3 and video files (mpg, swf, avi) into it. Restore it back to Raspberry Pi

and restart for the next stage of setup.

Convert your old TV into a music box

Connect the Raspberry Pi to the network router using Ethernet cable. You will immediately see network LEDs flickering. For most of the routers you do not need any configuration other than your router, which should be configured for DHCP.

Once the network is set up and the Internet is available, it is just a child's play now. First, update Raspberry Pi.

'`sudo apt-get update`' updates the available packages of Raspberry Pi.

'm0cP' is a beautiful console music player for Linux. By default, it is already installed on Raspberry Pi. In case it is not there, install it by using:

```
sudo apt-get install moc
```

The above command will check all the dependencies and install 'moc.'

Install all the other associated programs by:

```
sudo apt-get install mpd alsa-util  
amixer
```

In the terminal window, write 'm0cP' and press 'Enter.' The moc player will jump into the play mode now. Select the MP3 file using the arrow keys and press 'Enter.' The song will start playing from the TV speakers now. Try to control volume by 'mpd set 80,' which will increase the volume by 80 per cent.

However, to run all kinds of media files, install vlc player by:

```
sudo apt-get install vlc
```

The author is a mechanical engineer and presently works as additional general manager at NTPC Limited
