Samsung Galaxy S4 Coming to India in May

Samsung Galaxy S4, the much-awaited phone of the Korean smartphone company, has recently been launched in the market and, according to sources, it will be reaching the Indian shores pretty soon. The smartphone that comes with next-generation hardware and latest version of Android Jelly Bean operating system has been named as the fastest smartphone yet by Primate Labs. One of the most impressive technologies of the phone is the new 'smart pause/smart scroll,' which functions by mapping where your eyes are looking. According to a AndroidOS report, Samsung India may launch Galaxy S4 in the first week of May.

Exchange MTS MBlaze With Reliance EVDO Dongle

We already know that MTS will be shutting its shop in some regions like Mumbai, Maharashtra, Goa and Uttar Pradesh (East), which means all MBlaze data users will have to forgo their dongles and look for other alternatives.

One option could be Reliance Communications (Rcom), which is offering attractive packages for existing MTS MBlaze users in Maharashtra and Goa circle.

Largest Kindle Fire Tablet Gets a Price Cut

Amazon.com Inc has announced price cut for its largest Kindle Fire tablet. The company is said to be slashing the price to become attractive for consumers.

The Kindle Fire HD is a 22.6cm (8.9-inch) Wi-Fi tablet that will now be priced at \$269 in the United States. The introductory price of the device was \$299.

Now Use WhatsApp on BlackBerry Z10 Smartphone

After introducing the latest BlackBerry 10 operating system, the company had promised that it will soon launch the popular messaging service, WhatsApp Messenger for the platform. The day has come as the app is now available on BlackBerry World.

Power-packed Windows Phone 8 Smartphone

Nokia Lumia 520 features interchangeable shells in five colours

Nokia has launched its new Windows Phone 8 smartphone, the Lumia 520, in the Indian market. The Nokia Lumia 520 is said to be the company's most affordable Windows Phone 8 smartphone. Powered by Windows Phone 8, the device contains many of the features of its high-end siblings, including the same digital camera lenses, as well as maps and navigation from HERE, free music streaming and a 10.2cm (4-inch) sensitive touchscreen for an immersive smartphone experience.

Digital camera

lenses transform the 5-megapixel autofocus camera on the Nokia Lumia 520 into a fun way to cap-

ture pictures and share memories. Cinemagraph adds motion to still images that can then be shared with friends on Facebook, Twitter or via

email. Smart Shoot lets people create the perfect group picture, taking multiple images and selecting the best facial expressions from each, or even remove people from the shot. The easy to use Panorama lens captures super-wide-angled photos to take in more of the scene.

With an 8GB mass memory and expandable 64GB memory slot, Nokia Lumia 520 also allows to store a wealth of content created and collected.

Nokia Lumia 520 is available in yellow, red, cyan, white and black with changeable shells.

Price: Approx. ₹ 10,000

Colourful Music Companion

Add some colour to music with UrbanEars' Plattan headphone

UrbanEars brings to you its range of headphones and in-earphones suiting your taste and comfort-level. These are available in four models—Plattan, Tanto, Bagis and Medis with attractive colours like grape, mustard, tomato, mocca, white, black and denim editions.

According to the company, Plattan is designed to be the perfect classic headphone with all the additional features that make it above and beyond what a static headphone would offer. It is a full-size on-ear model with a rich secluded sound in a compact body.

It folds down to the size of your fist and comes with a ZoundPlug, allowing for a friend to plug in and share your music. With this feature, two people can listen to the same music through one common source.

Price: ₹ 5750
