

Conferences & Seminars At A Glance

EFY Design Engineers' Conference

This conference imparted many quality lessons to design engineers on how to reduce power consumption in circuits and systems. The speakers also covered various multi-disciplinary aspects of this issue. The topics discussed included the step-by-step process of monitoring power consumption of a system while different techniques were implemented to lower the power consumption. The conference also covered ways to reduce power consumption in Android devices by using software tweaks in Linux kernel.

A whole new perspective of using 'common sense' to improve the efficiency of a system was discussed—emphasising on understanding customer requirements, rather than merely building a product to comply with a spec sheet.

Following this, there was a session on how power electronics also helped to unleash really low power functioning of systems, pointing out that it is not only MCUs and software that helps.

Exhibitors' Testimonials

We are glad to get associated with EFY Expo 2013. It has served as a great platform to connect with our peers and customers. This is our second engagement with EFY Expo and we wish and hope for more projects.

Sunil Dhar, GM, Renesas Electronics Singapore Pte Ltd

We felt that the display of the live SMT line was an excellent and earnest effort by the EFY group. The show allowed us to display our EKRA printer platform to new customers and also introduce our laser marking equipment technology to the market.

Shailendra Mathur, GM India, ASYS Group

We have received good response from the Expo and also hope to generate leads from this show.

Prashant Jain, senior product manager, Fluke India

Last year, we got a good response at the EFY Expo. Therefore this year we had taken a bigger booth. I am happy with the enquiries that we have generated.

Prabhanjana Rao, regional sales manager, India, SE Asia and ANZ, Lecroy India Trading Pvt Ltd

The show was good... there was a good response. I am happy about

the overall management of the show.

N. Chandramohan, country head (SMT division), Juki India Pvt Ltd

We were slightly sceptical with the response on the first day which we assume was basically due to the strike in Delhi. However, the Expo picked up in the next two days and we are quite satisfied with the footfalls.

Indraneel Mukhopadhyay, executive PPC, RS Components & Controls (India) Ltd

It was a better show than last year. This show is certainly getting acceptance within the industry, which is good.

Anil Bali, vice president, Deki Electronics Ltd

We have received some decent enquiries from this Expo. The first day witnessed fewer footfalls due to the strike, which then gradually picked up. We are satisfied with the response here.

Raman Chawla, accounts manager, element14 India Pvt Ltd

We have generated good enquiries in three days. There are a few distributors who approached us and we are interacting with them.

Sumit Sharma, marketing manager, India, Good Will Instrument Co. Ltd
