

Seminar on RoHS Compliant Electronics Manufacturing: Challenges, Solutions & Opportunities

Dr N. R. Munirathnam, scientist and head, Ultra Pure Materials Division & RoHS Group, C-MET, Government of India

B. N. Shukla, business unit manager, Jabil Circuits India Pvt Ltd

Tobias van Rossem, area sales manager, soldering systems & printing machines, ERSA GmbH

Suresh Shanmugam, engineering leader, chemicals industry, U. L. India Pvt Ltd

Lead-free assembly has an impact on design, manufacture and reliability of electronic products. This seminar provided practical insights into the inspection criteria, the changes that take place in the process conditions and the process monitoring to get the highest yields. The seminar explained RoHS regulations, how to optimise key processes, the potential problems at each stage of manufacture and how to avoid them.

DeiTY Conference on National Electronics Policy

J. Satyanarayana, secretary, DeiTY, government of India

S. K. Marwah, additional director, DeiTY

Ajai Chowdhry, founder, HCL

The conference highlighted several issues of the National Electronics Policy and explored ways to boost indigenous electronics manufacturing. DeiTY's initiatives to support R&D and innovation were also highlighted. Other topics discussed were skills development for the ESDM sector and mandating standards for the Indian electronics industry.

ELCINA Conference on Synergising Investments with Market Dynamics

Ajay Shankar, member secretary, National Manufacturing Competitiveness Council

N. Ramachandran, MD, MEL Systems

Dr Markus Hildenbrand, MD, Bosch Automotive Electronics India Ltd

The conference covered the changing global scenario for electronics manufacturing and the emerging opportunity for India. It also highlighted opportunities in EMS, trends in modern medical electronics and business opportunities in consumer electronics industry, LCD/plasma displays and set-top boxes.
