

Buyers' Testimonials

The concept of the buyer-seller meetings is good. We came to the Expo with an open mind, with no one particular vendor as our focus. We found 4-5 good alternatives and we are in touch with those vendors for business opportunities to materialise. Something that I really liked about the show was the choice of vendors. Some of the vendors were RoHS certified, which increases the trust value of the deal. We can comfortably bank on such vendors. This is a clear demarcation between the EFY Expo and the other electronics shows.

Shailesh Mishra, head, technical regulations, Panasonic

We were looking for the raw material for our products at this show. We leveraged EFY Expo to find some good alternatives to our existing vendors. With the new alternatives in hand, we are sure we will be able to strike better deals henceforth.

Avinash Deshmukh, senior manager, imports, Videocon

We had some requirements related to electronics components. We already deal with some vendors for those components but I was looking for some alternatives to break their monopoly. There were some really good offerings for the consumer segment and I did find some alternatives. The discussions are on with them.

Mayank Mishra, project manager, DRDO

I was looking for stencil makers, reflow oven and some connectors at the EFY Expo 2013. The show proved extremely fruitful for me as I could find some good alternatives there. I got an opportunity to know the latest in the industry. I am working with some vendors and will be able to conclude the deal soon.

Bhamidimarri Bharati Swaroop, director, Rotavio Labs Pvt Ltd

The exhibition was very useful for us. It was a perfect platform for businesses to grow with apt business partners. From R&D perspective, it was a platform where we met lots of prospective and potential business partners for exploring avenues to grow the business.

Sanjeev Bhatia, Key Strategic Purchasing Competence Centre India, Giesecke & Devrient India Pvt Ltd
