

### Tiny Linux Mint Desktop PC with Core i5

CompuLab and Linux Mint brings a small Linux Mint computer nicknamed MintBox 2

CompuLab and Linux Mint have joined hands and are ready to bring a whole new line-up of tiny desktop computers which have been specially crafted to run the Linux Mint operating system. Previously, in 2012, the two groups teamed up to bring MintBox devices with AMD processors. And now the new model of the Mintbox sports faster processor, additional storage and much longer period of warranty.

As mentioned on the Linux Mint blog, the latest models are powered by Intel Core i5 processor, which offers about four times better performance as compared to its previous model. In addition to the i5 processor, the MintBox 2 features 4GB RAM, 500GB hard drive and dual Gigabit Ethernet ports. And while the MintBox 1 came with one year of warranty, the current model MintBox 2 will come with five years of warranty.

The processor is expected to be Haswell, though the same has not been confirmed yet. The MintBox 2 will be priced at around \$599 and the same will be available for retail soon.
