

8-bit Price for 32-bit Power Switch to XMC1000 now!

The new XMC1000 product family drastically improves today's 8-bit applications' performance to 32-bit power. Integrated into a leading-edge 65nm manufacturing process, the price for this new ARM® Cortex™-M0 based microcontroller, however, remains at the 8-bit level. XMC1000 is the entrance ticket into the XMC world. Peripherals like timers, A/D converters and serial communication interfaces are common with XMC4000 products. The DAVE™ software development environment is available for XMC1000 as well as free download. There are three series with more than 20 products in three package types. XMC1100, XMC1200 and XMC1300 support software re-use plus easy interchange of hardware with certain packages.

XMC1000 Key Features

- 32-bit ARM® Cortex™-M0, 32MHz
- 8kB to 200kB Flash memory most scalable Flash portfolio in low-end
- AES 128-bit secure loader for SW IP protection
- Patented LED color control engine
- Leading edge XMC mixed signal and timer peripherals
- IEC 60730 class B compliant
- Peripherals for touch and LED display control
- 64MHz MATH Co-processor for advanced control loops (CORDIC / DIVIDE)
- Extended temperature range up to 105°C
- Start evaluation of XMC1000 with our Boot Kits available
