Colibri ARM Family

Salient Features of Our Products

- ☛ World's Fastest Cold Boot < 500 milliseconds
- ☛ Upto 321 pins available on our modules.
- ☛ Direct Breakout™ for low cost PCB design.
- ☛ DVFS & Thermal Throttling to achieve the lowest Power Consumption.
- ☛ Unique MXM SnapLock™ mechanism.
- ☛ Upto 127 GPIOs, SPI, CAN, I2C, PWM, Parallel Camera other Industrial peripherals available.
- ☛ Dual Display with 1080p resolution.
- ☛ 12 core NVIDIA GeForce GPU with 2D, 3D Hardware acceleration.
- ☛ IT temperature range also available.
- ☛ All Software Library, Diagnostic Tools, Operating System Images, knowhow and Hardware Design Datasheets available for free at <http://developer.toradex.com>

Introducing Ultra Low Cost Computer Module

Colibri Vybrid VFxx

Starting @ INR 1,500/-

- ☛ Most Cost Effective ARM Computer Module
- ☛ Based on VF50 and VF61 by Freescale
- ☛ Samples Available from September 2013
- ☛ Onboard CAN Support
- ☛ 12 ADC / 17 PWM Channels
- ☛ Linux and WinCE Supported
- ☛ NEON FPU
- ☛ Also Available in Industrial Temperature Range (-40° to 85° C)
- ☛ Analogue Video Capture
- ☛ Pin Compatible with Existing Colibri Product Family

High CPU and graphic performance
with minimum power consumption.
