

Avago Product Solutions for
Small Cell Front End

Enabling Next Generation Small Cells

- Comprehensive portfolio of Small Cell RF front end solutions
- Best-in-class PA featuring unmatched linearity, gain and power efficiency with integrated power detector and shutdown function
- Ultra low NF LNA greatly enhancing Small Cell receiver sensitivity
- Innovative FBAR filter enabling stringent adjacent multi-band operation without performance degradation due to interference
- Common component footprint and application circuitry across different frequency bands simplifying platform-based hardware design
- Integrated modules reducing parts count, board space, design time, and BOM cost
