

New Tiva™ C Series MCUs higher speeds, larger memory and lower power

www.ti.com

The new Tiva C Series TM4C123x ARM® Cortex™-M4 MCUs are the first Cortex-M-based MCUs to be built on 65 nanometer technology, setting the roadmap to higher speeds, larger memory and lower power.

Introducing the Tiva™ C Series TM4C123G Launchpad

The Tiva C Series TM4C123G LaunchPad Evaluation Kit is a low-cost evaluation platform for ARM® Cortex™-M4F-based microcontrollers from Texas Instruments. The design of the TM4C123G LaunchPad highlights the TM4C123GH6PM microcontroller with a USB 2.0 device interface and hibernation module.

Features

The Tiva C Series EK-TM4C123GXL LaunchPad Evaluation Kit offers these features:

- A TM4C123G LaunchPad Evaluation board
- On-board In-Circuit Debug Interface (ICDI)
- USB Micro-B plug to USB-A plug cable
- Preloaded RGB quickstart application
- ReadMe First quick-start guide
