

LG Debuts LG G Pro Lite in India

The dual-SIM phablet has a dedicated hot key, which provides total communication flexibility

LG has launched its latest smart-phone device, LG G Pro Lite Dual. This dual-SIM phablet has a dedicated hot key, which provides total communication flexibility, allowing users to manage two phone numbers from a single phone easily. The new phablet comes with 13.9cm (5.5 inches) qHD IPS display and runs on the Android Jelly Bean OS. It has a huge 3140mAh removable battery along with an 8-mega pixel BSI camera and a 1.3-mega pixel front camera.

In addition to its large IPS display, the newly-launched G Pro Lite has a qHD resolution and is powered by a 1GHz dual-core processor along with 1 GB of RAM. The LG G Pro Lite is a feature and experience-rich smartphone specifically designed to provide communication flexibility.

A stylus pen is included with the device, which allows for quick and accurate handwriting and can be stored conveniently in a slot at the top of the phone. The LG G Pro Lite comes with dual speakers for excellent audio performance with or without headphones.

65-inch UHD TV With 4K 60p Input

The ultra HD TV is the ultimate choice for consumers looking to access the next level in home entertainment

Panasonic has unveiled Smart VIERA TC-L65WT600, world's first ultra HD TV with a 4K 60p input, designed based on HDMI 2.0 and DisplayPort 1.2a specifications. Offering up to 60 frames per second 4K playback, the WT600 is the ultimate choice for consumers looking to access the next level in home entertainment, or for anyone for whom picture quality is imperative.

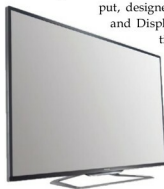

WT600 panel's 2400 Back Light Scanning (BLS) technology provides incredibly high motion sharpness, even in fast action scenes. The TV also features a minimalist design, with a thin metal frame that focusses attention on the stunning 4K images. It offers access to a wide range of 4K content to

make the most of its screen innovations, allowing users to dramatically expand their 4K experience with not only video content but also groundbreaking games, Internet content, and their photos—all in stunning 4K quality.

The next-generation 4K 60p input, designed based on HDMI 2.0 and Display, Port 1.2a specifications, helps assure compatibility with future 4K players, set-top boxes and next-generation gaming consoles.

As an industry leading-edge technology, WT600 has a built-in 4K H.264 (MPEG4) decoder, which not only enables the playback of 4K video files

via USB and SD memory card, but— even more importantly—enables the playback of 4K content directly from the Internet5.
