expand 'Print/export' list on the left side of the Wikipedia page as shown in Fig. 1. If it is already expanded, then skip this step.

Step 2. Open Wikipedia e-Book Creator by clicking on 'Create a book' as shown in Fig. 2.

Step 3. Now click on 'Start book creator' as shown in Fig. 3 to start creating the book, or click on 'Cancel' if you want to exit from the book creation process.

Step 4. You can add pages to your book by clicking on 'Add this page to your book' as shown in Fig. 4.

You can add as many pages as you like in your book. Just search your favourite page or content, such as on 'Internet.' You will see 'Book creator (disable)' header on top as shown in Fig. 5. Click 'Add this page to your book' whenever you want to add the content of the current page to your e-book. You can also click on 'Remove this page from your book' to remove a page from your book as shown in Fig. 6.

Step 5. Click on 'Show book' to go to your book manager as shown in Fig. 7.

Step 6. Manage

your book with Wikipedia Book Manager as shown in Fig. 8.

Step 7. You can download your book by clicking on 'Download' as shown in Fig. 9 and wait for the process to be completed.

Step 8. When rendering is finished, download the file from the link given.

Do check for the license at the end of your e-Book as shown in Fig. 12. If you do not want to download the book, you can save your e-book in Wikipedia by creating Wikipedia user account. Anytime later you can even add pages to the book. •
