

Government emphasises on 'standards' for electro-tech devices

Keeping in mind the high demand of electro-tech devices, the government of India now wants to pitch in 'standards' for the products to ensure utmost security and energy-efficiency levels.

Consumer Affairs Minister K.V. Thomas has raised his voice highlighting importance of standards for electro-tech devices. He said that the

The minister of state (independent charge) for Consumer Affairs, Food and Public Distribution, Prof. K.V. Thomas delivering the presidential address at the opening ceremony of the 77th IEC General Meeting, in New Delhi

Indian industry should actively participate in International Electro-technical Commission's (IEC's) technical work. IEC is a global body, which is responsible for publishing standards for electrical and electronic components, devices and systems.

Thomas was speaking at the 77th general meeting of the IEC, where he said, "Standards in the electro-technical areas have an important role to play for ensuring efficient and safe generation, transmission and utilisation of power."
