Sale of desktops, notebooks to grow at 6 to 18 per cent CAGR

From 2014 to 2018, there will be an increase in the sale of desktops and notebooks in India from 6 to 18 per cent CAGR, which will contribute additional GDP of ₹ 663,000 million and employment for 111,600 people, according to a report released by Manufacturers' Association for Information Technology (MAIT) and KPMG together.

The report titled 'Indian market place - IT the unrealised potential,' which was unveiled by Dr Sam Pitroda, adviser to Prime Minister, estimates that the current PC penetration in rural India is limited to approximately 9 million households whereas, approximately 14 million households who fall under the affordability bracket of ₹ 0.5 million annual family income do not have PCs.

Li-ion battery backup market to grow manifold

The emerging battery market will have a steady growth rate owing to the demand and revenue from stationary battery back-up systems for industrial users, hospitals and data centres, which is not entirely seen as the 'flourishing' part of the segment.

According to a recent report released by Lux Research, a market analysis firm, the market for lithium-ion battery backup and UPS systems is expected to grow six-fold between now and the end of the decade. The report stated, "Lithium-ion batteries will lead growth in the stationary battery back-up market, climbing from \$143 million to \$553 million in the next six years."
