Lumia 1820, 2020 may be coming in 2014

Nokia is reportedly working on a high-end Windows phone-based device called Lumia 1820. According to reports, the Finnish smartphone maker is preparing to launch a 20.3cm (8 inches) tablet along with the Lumia 1820 smartphone some time next year. The company had only recently unveiled Lumia 1520 and five other devices at the Nokia World event recently.

Dell Ultrabooks smelling of cat urine

Dell has reportedly accepted that some of its ultrabooks smell of cat urine. The technology giant though also said that the smell is not a result of any biological contamination of the device, and neither is it a health hazard. The admission comes after complaints from a number of Dell users, who had complained that the Dell Latitude 6430 Ultrabooks have been smelling of cat urine.

All-in-one smartphone app

Viper has launched Viper Home, an affordable, self-installed home security monitoring system that could be completely controlled by a smartphone. Viper Home will be integrated with the Viper SmartStart car security app through the new ViperConnect app, creating the world's first all-in-one home and car security monitoring solution for the smartphone.

Intex brings Aqua i6 smartphone

Domestic smartphone manufacturer Intex is adding another smartphone to the Indian market. The new Intex Aqua i6 is a budget smartphone, which is priced at ₹ 8990 and has a 12.7cm (5 inches) screen. The device is powered by a 1.3GHz MediaTek 6582 quad-core processor. In addition, it also has the Mali 400MP2 graphics processing unit.

mTAB dual-SIM tablet/phablet

The Mercury mTAB streaQ Duo tablet device has been launched in the market by computer peripherals and tablet maker Kobian.

Simmtronics 3G Calling Tablet

The XPAD Freedom runs on Android 4.2.2 Jelly Bean operating system and has 3G calling features

Simmtronics has launched the XPAD Freedom tablet in Indian market. The device runs on Android 4.2.2 Jelly Bean operating system and has 3G calling features. The tablet is priced at ₹ 13,999 and comes with a free cover. According to the company, the cover will be useful to make it like a table top and watch movies comfortably.

The resolution offered by the tablet is 1024x768 along with 19.9cm (7.8 inches) IPS Retina screen. The presence of 3-axes load sensors with the screen provide automatic four directions to display, which ame-

liorates the experience of high-end technology.

The device also has a 3.5mm jack along with an HDMI port and comes

with a 3.5mm stereo earphone, which has captive power to flame the acoustics. It has a 5-mega-pixel primary camera and a 2-mega-pixel secondary camera. The camera is flash enabled as well.

This all-in-one workhorse has been de-

signed as the perfect companion for professionals and students who desire both reliable communications as well as optimum convenience—all at an affordable cost.
